submissions:
30 June 2020

Message from the Guest Editors

Dear Colleagues,

This Special Issue will follow the 9th European Spores Conference, which will be held in Naples, Italy, on 15–17 April 2020 (www.sporesconference.org). Selected topics from those presented at the conference will be the core of this Special Issue on “Bacterial Spores”, focused on basic and applied research on spore-forming bacteria, mainly belonging to the *Bacillus* and *Clostridium* genera.

Based on these considerations, this Special Issue will gather papers from a number of leading scientists in the field, which is a very active area of basic microbiology research with a strong impact on applied sciences, ranging from health to food safety to bioremediation.

Prof. Dr. Ezio Ricca

Message from the Editorial Board

The International Journal of Molecular Sciences (IJMS, ISSN1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. IJMS publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in IJMS and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility: indexed by the **Science Citation Index Expanded** (Web of Science), MEDLINE (PubMed), Scopus and other databases.

Rapid publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 15.7 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2019).
